AlumierMD skin peel treatments are the next generation of clinical exfoliation. With a variety of peels, each with a unique complex of ingredients, our AlumierMD professionals will create a hyper-customised program of treatments to target your specific skin concerns whether it be ageing, pigmentation, rosacea or acne. This unique experience includes an exfoliating peel treatment, brightening enhancement followed by prescriptive target serums to reveal a more radiant, soft and luminous skin. Using a variety of medical grade ingredients such as salicylic acid, lactic acid and vitamin A, our highly trained expert therapists will create your bespoke hyper- customised treatment. Your specific skin concerns will determine whether we use ingredients to target deep skin exfoliation, boost cell turnover and stimulate collagen, improve skin texture and tone, or target fine lines and wrinkles, discolouration, sun damage and large pores.
